

Triton Innovation, LLC provides high quality conveyors, container dumpers/tippers, and specialty products designed to meet the vast array of needs in the food processing industry. Whether basic FDA painted wipedown, Stainless Steel washdown, or higher-level hygienic requirements, choose from standard design packages or a customized solution to best suit your application's needs.

DUMPER/TIPPER

Ergonomic, efficient, and reliable method for dumping a variety of containers. Available in a wide range of load capacities, dump heights, and rotating drum sizes.

HOMOGENEOUS BELT CONVEYOR

Hygienic and easily cleanable FDA belt, ideal for dry, wet, or oily products, up to 5 times longer life span than standard fabric belts.

METERING FEEDER SYSTEMS

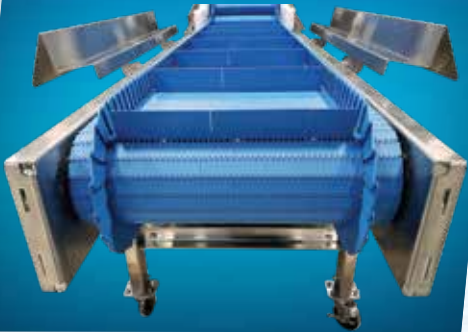

Effectively store, feed and gently transport even amounts of product at a steady, controlled rate for a range of food handling and packaging applications.

Is food safety impacting your processing operations?

Contact us today – Triton is here to help.

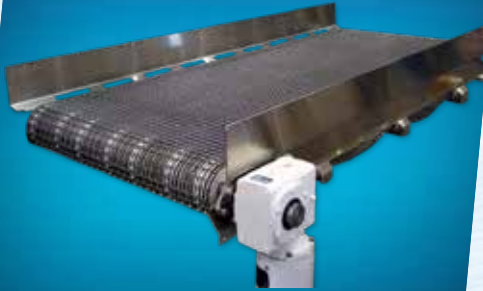

Would your production facility food handling equipment benefit from improvements in efficiency, productivity and safety?

MODULAR PLASTIC BELT CONVEYOR

Positively/sprocket driven, strong, low maintenance, and easily cleanable FDA belt. Offering versatility in filling, washing, rinsing, inspecting, or packaging applications.

WIRE MESH BELT CONVEYOR

Withstands extreme temperatures and maximizes air flow through the belt. Great for processes such as battering, breading, glazing, coating, cooling, drying, and washing.

FABRIC BELT CONVEYOR

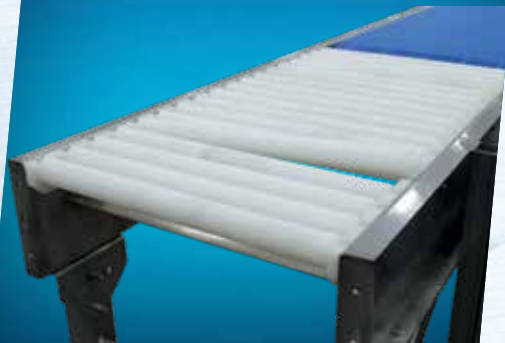

Available in many configurations and with various hygienic features and FDA belt material choices.

TROUGHED BELT CONVEYOR

Efficient and reliable means of moving bulk and loose materials. Naturally centers product to help eliminate spillage while gently conveying materials. High volumes of product can convey longer distances more economically than other belt conveyors.

SPECIALTY PRODUCTS

Whether it is a modified design of an existing piece of equipment or something unique, we'll work with you to develop a solution for your food handling application needs.

Hygienic Level I: Carbon Steel Materials, Industrial Designs, FDA Powder Coated, Non-Washdown Drive, NEMA-1 Electrical/Control Items

Hygienic Level II: Stainless Steel Materials, Washdown Designs, Washdown Drive, NEMA-4X Electrical/Control Items

Hygienic Level III: Stainless Steel Materials, Hygienic Open/Cleanable Designs, Stainless Steel Drive, NEMA-4X Electrical/Control Items
