

PENDULUM BUCKET ELEVATORS

Triton Innovation's Pendulum Bucket Elevators simultaneously execute vertical and horizontal transportation of dry, bulk material within a compact footprint. Offering virtually limitless configurations, multiple infeed and discharge points, and effective management of high volumes of product for various processing, production, and packaging applications.

- Modular design enables ongoing flexibility and versatility.
- Multiple infeed and discharge points.
- Gentle handling of both fragile and non-fragile material.
- Buckets are made with FDA or sanitary materials designed for easy, tool-less removal.
- Easily cleanable design enhances efficiency for batch and recipe changeovers.
- Buckets overlap to eliminate product spillage. Tapered shape enhances product release, promotes complete removal, and reduces accumulation points.
- Common configurations: Z-Style, C-Style, E-Style, Inclined Z-Style, Double Z-Style. Custom configurations available upon request.
